Totals	1.58	nil	1.97	1.52	3.38	1.19	2.81	7.57	2.20	7.75	2.98	5.16	
Total from Jan. 1	1.08	1.08	3.05	4.57	7.95	9.14	11.95	19.52	21.72	29.47	32.45	37.61	

During January & February ~~this~~ Rain gauge (which had previously been kept by the Vicar The Rev. J. A. Lloyd) was kept by Mr Frank Hussey. On The Rev. E. Audrey coming into Residence as Vicar the observations were taken over by him..

March notes. the 9th & 10th are bracketed together as at the time for observation on the morning of the 10th the snow was falling & drifting so heavily that it would have been impossible to melt & measure without losing some considerable quantity consequently I judged it better to postpone the measuring till the following day. Those days on which snow forms a part or the whole of the fall are registered in red ink, & that will be my system.

May notes. In addition to what has been registered in detail there was a small quantity on the 25th & on the 31st not enough to register individually but would together amount to about $.03\frac{1}{4}$ & if all had fallen in one day would therefore have been registered as $.01$.

July notes. From July 21 to Aug 12 inclusive the rain was taken in my absence by my servant who had put the amounts down on the days that they were taken instead of on the previous one. This I did not discover till after I had made the entries on the other side.

August The highest monthly record since the rainfall began to be registered here. In 1882 7.36 fell in October, and in 1879 7.21 fell in August. With these two exceptions no monthly total as reached higher than 5.66.

October The highest monthly record at this station since 1879 when the register began to be taken; this year therefore has as yet produced 3 extraordinary features. One month (February) without a drop of rain and two months (August & October) each beating the record in rainfall up to date. Probably the $.01$ registered on the 27th the 30th & 31st was dew, but as it was in the bottle I was bound to register it as rain.

Obs. States that 1.88 in printed in Wills tables for Sept. is incorrect

PRICE 3d.

The School
 Collingbourne Kingston
 April 2nd 1895

Dear Sir

Below I give an exact copy of the returns furnished to Mr Baldwin Latham for July 1894.

The total rainfall for the 16th & 17th was .16 and for the 25th & 26th it was .25. I indicated this by bracketing the dates mentioned as shown below.

As the total for the month - viz 3.83, was also given it is curious that they could not see that the .16 & .25 were the respective totals for the dates mentioned.

On the mornings of the 17th & 26th I was unexpectedly absent from home, hence the reason for the rainfall for the two days being shown together.

Yours Truly
 E. G. Drew
